

IN THE CLAIMS:

Please amend the claims as follows:

1. (currently amended) A microwave oven liner comprising:
[[•]] a roof,
a floor,
a back, and
two sides (~~“the floor and the other panels”~~),
~~all being of~~ wherein said roof, floor, back and two sides are all fabricated from food
grade plastics material and of sufficient rigidity for automatic washing, ~~the whole~~
said liner being sized to fit removably in a microwave oven, and
wherein the roof is shorter at the front than the floor, which is open and is
configured to be open relative to the microwave oven, so as ~~than the floor,~~ to allow air
to circulate for steam withdrawal from the oven.
2. (original) A microwave oven liner as claimed in claim 1, wherein the roof is
apertured for withdrawal of circulated air.
3. (original) A microwave oven liner as claimed in claim 2, wherein the aperturing
of the roof is a series of holes acting as a coarse filter of spat food.
4. (previously presented) A microwave oven liner as claimed in claim 1, including
an upstanding lip across the front of the floor, to retain spilt liquid.
5. (previously presented) A microwave oven liner as claimed in claim 1, including a
series of ridges on the floor of the liner.

6. (original) A microwave oven liner as claimed in claim 5, wherein the ridges stand up to 5mm high.
7. (previously presented) A microwave oven liner as claimed in claim 1, wherein the ridges stand 2mm high.
8. (previously presented) A microwave oven liner as claimed in claim 1, wherein outside corners between the roof and other panels and the floor and other panels are chamfered or rounded to allow ready insertion of the liner into the oven without interference with oven corner seals.
9. (previously presented) A microwave oven liner as claimed in claim 1, wherein the liner is of sheet bent and adhered together.
10. (previously presented) A microwave oven liner as claimed in claim 1, wherein the liner is injection moulded.
11. (previously presented) A microwave oven liner as claimed in claim 1, wherein the liner is of two or more two parts, welded together.
12. (original) A microwave oven liner as claimed in claim 11, wherein the two parts are joined at mid-height, the back and sides tapering inwards to the floor and the roof from the joint.
13. (previously presented) A microwave oven liner as claimed in claim 1, wherein the liner has a mirror finish.

14. (original) A microwave oven liner as claimed in claim 13, wherein the liner is transparent.
15. (previously presented) A microwave oven liner as claimed in claim 1, wherein the liner is of polycarbonate or polypropylene material.
16. (original) A microwave oven liner as claimed in claim 15, wherein the material includes a fire retardant.
